

.exciting lighting!

Studies show that good lighting is vital for success

"The Hightrack is just what I have been looking for. It is a very slick system and extremely easy to install. I was highly impressed with the quality, especially in relation to the incredibly competitive price."

Sean Douglas,
Director,
Display Systems Ltd.

Our eyes are designed to be attracted to light. This is why research has shown that sales can actually rise by an incredible 107% when you create more dramatic displays or signage through dynamic lighting.*

Lighting can be used to create moods, designs, more dynamic office environments, more compelling retail offers or to spotlight products or services around which you want to increase sales. 70% of purchasing is on impulse. Don't miss the opportunity to increase your sales by 107%. Call one of our experts for free insights and information on increasing sales.

HIGHTRACK...

Hightrack is a modular low-voltage system, using an ultra-slim track profile and miniature spotlights. It provides ultimate flexibility and freedom in lighting design.

You will be able to create a design that will allow you to locate light exactly where it is required.

The distinctive low-voltage fittings make the system ideal for retail, display, exhibition, galleries, offices and leisure applications.

Low-voltage track system only 24mm diameter, 12 volt (25 amp system) can be used with transformers up to 300 watt.

Simple to use:

- Plug-in transformers
- Quick Jack adaptors
- Add pendant drops to Quick Jack Adaptors
- Fit directly to ceiling/wall
- Choice of suspension systems (cable/high tech supports)

Light styles:

All below take up to 50 watt lamp (GU5.3)
